### Meet & Greet

Trinity Primary held two of its first 'Meet & Greet sessions at the ending of last month. The idea behind these meetings was to encourage parents to become more involved in our schools community and to create an informal group where they can raise issues, be consulted on school policy and give their views, as well as come together to share their experiences and learn about current affairs and how they can further help their child.

From the schools perspective we wanted to offer a forum where we could provide advice and give information for individual's needs. We wanted a space and the time where we were able to offer strategies and our support not just from an academic view point, but also from a more holistic approach.

Both sessions were an excellent way of meeting parents, sharing ideas and concerns and also planning for the future. The first meeting brought 9 parents in total. Word of mouth brought a new cohort with numbers growing to 11. Obviously we would like the numbers to increase so please keep an eye/ear out or enquirer about dates and times of the next meeting.

It was encouraging to see the interest of the parents and to also listen to their ideas and what they felt was important for them, their children and the school community. We look forward to seeing you and if you have any questions or suggestions please contact:
